my HVAC/R MONITOR

my HVAC/R Monitor is a SaaS platform focused on HVAC and Refrigeration systems

Are any units not performing?

How has performance been for the past 7 days?

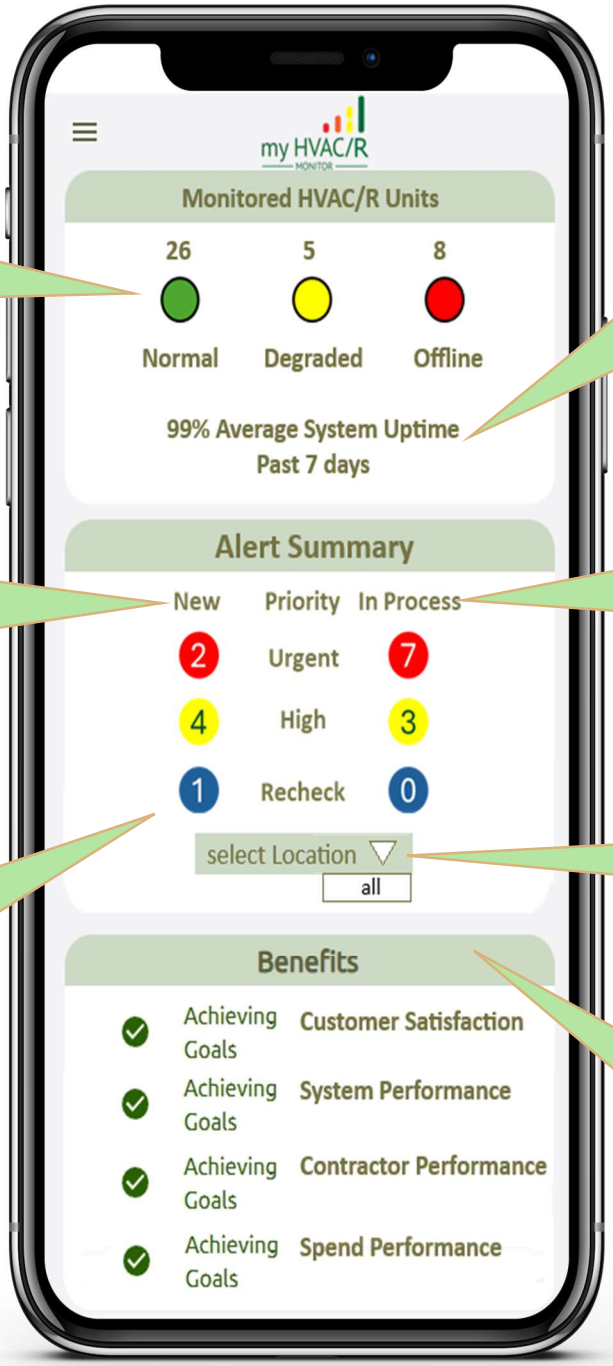
Are there new issues that need to be addressed?

What alerts are unresolved?

Has the alert condition come back within 30 days?

Alert details by location

Are we achieving our Goals?



Key Capabilities

- ✓ 24 x 7 x 365 data collection, building alerts, reminders, notifications, and reporting
- ✓ 15+ HVAC/R specific alerts
- ✓ Asset service history log
- ✓ Low cost / accessible
- ✓ Improving the customer experience
- ✓ Benefits tracking
- ✓ Service integrity check
- ✓ Improving the performance of service providers
- ✓ Utilizes independent data
- ✓ Coolnomix integration (AC-01 for HVAC, AR-01 for Refrigeration, AF-01 for Deep Freeze)

my HVAC/R MONITOR

my HVAC/R Monitor has a variety of alerts designed to focus action, improve response time, and minimize site visits.

Delta T outside of normal range?

Are the blower or evaporator fans working?

Is the Compressor short cycling?

Heating and Cooling at the same time?

Is the Compressor running constantly?

Are the temperature / humidity levels correct?

Is power consumption at normal levels?
